

Establishment of a technical training center in Kazakhstan.

One goal of the cooperation between Germany and Kazakhstan is the establishment of a training center for technical professions.

Data and facts

Client	German Federal Ministry of Education and Research
Period	August 2017 – July 2020
Site	Kazakhstan
Services	Development of training programs

INITIAL SITUATION AND REQUIREMENTS

The establishment of a training center based on the German model is part of an initiative to optimize the economic and educational system in Kazakhstan. At the same time, the project is set to pave the way for German companies to move into Kazakhstan by using German education and training concepts. The initiative focuses on the establishment of an education and training center by developing curricula and training local lecturers. At the same time, the project process undergoes scientific monitoring.

SOLUTIONS, RESULTS

In addition to establishing sustainable partnerships in Kazakhstan, a further objective is to develop a suitable training program for the fields of mechatronics, logistics, and sustainable energy. The establishment of the GeKaVoC (German-Kazakh Vocational Education Centre) makes it possible to create a platform for education, training, development, and the commercialization of training services. In addition, GeKaVoC will provide a suitable framework for cooperation between companies, vocational schools, and secondary schools.

YOUR BENEFITS

Training programs at TÜV Rheinland Academy in the field of Technical and Vocational Education and Training (TVET) close the technical education gap between state school-leaving or higher education qualifications and the professional requirements of industry. As an internationally experienced partner in the development of technical skills, TÜV Rheinland Academy is precisely the right solution provider. By implementing the dual system based on the German model, we ensure that education and professional life work hand in hand at local vocational schools. In this way, existing and new employees grow into specialized tasks in a targeted and future-oriented manner.

DID YOU KNOW...?

Kazakhstan is the ninth largest country in the world and has the strongest economy in Central Asia. However, since only a small elite benefits from the country's oil and gas reserves, the government is currently attracting more private investment from abroad. It is also striving to modernize and diversify the economy in order to reduce the country's dependence on the extraction of raw materials. A prerequisite for this is a large number of well-trained skilled workers.

ABOUT TÜV RHEINLAND ACADEMY

In times of emerging markets and increasing demand for skilled workers, technical expertise requires a reliable companion. With branches all over the world, TÜV Rheinland Academy is the international institution for technical and professional expertise in all important subject areas. We impart and verify specialist knowledge in precisely the right way. Our innovative training solutions range from individual training courses to customized personnel development concepts. In this way, we comprehensively strengthen the technical skills of participants all over the world.
