

Training programs for the oil and gas industry in Saudi Arabia.

As Saudi Arabia urgently needs qualified specialists in all industrial sectors, the vocational training system is currently being fundamentally modernized. Against this background, TÜV Rheinland Academy is responsible for the development and implementation of special training programs to qualify future employees in the oil and gas industry.

Data and facts

Client	National Industrial Training Institute (NITI)
Period	Since January 2015 – ongoing
Site	Saudi Arabia
Services	Training of college graduates

INITIAL SITUATION AND REQUIREMENTS

As part of the modernization of the education system in Saudi Arabia, government and industry have launched many joint projects and public-private initiatives. The National Industrial Training Institute (NITI), a joint venture between Saudi Aramco and the Technical Vocational Training Cooperation (TVTC), is one of these initiatives. TÜV Rheinland Academy was selected as the international training partner to develop and implement training programs for young college graduates.

SOLUTIONS, RESULTS

TÜV Rheinland Academy is responsible for the operational implementation of various training programs. These include a wide range of vocational training programs. The different programs last between 3 and 12 months. NITI is having a capacity of up to with up to 2,500 participants per year. In addition, TÜV Rheinland Academy is optimizing existing curricula, supervising the revision of workshops, and providing an industry-specific seminar program as well as the final assessment.

YOUR BENEFITS

Training programs at TÜV Rheinland Academy in the field of Technical and Vocational Education and Training (TVET) close the technical education gap between state school-leaving or higher education qualifications and the professional requirements of industry. As an internationally experienced partner in the development of technical skills, TÜV Rheinland Academy is precisely the right solution provider. By implementing the dual system based on the German model, we ensure that education and professional life work hand in hand at local vocational schools. In this way, existing and new employees grow into specialized tasks in a targeted and future-oriented manner.

DID YOU KNOW...?

With a global market share of 10 %, Saudi Aramco is considered the world's largest oil company in its sector. But the country's economy is facing major structural challenges. These include reducing dependence on global oil markets, further diversifying the production facilities, and improving the employment prospects of local production.

ABOUT TÜV RHEINLAND ACADEMY

In times of emerging markets and increasing demand for skilled workers, technical expertise requires a reliable companion. With branches all over the world, TÜV Rheinland Academy is the international institution for technical and professional expertise in all important subject areas. We impart and verify specialist knowledge in precisely the right way. Our innovative training solutions range from individual training courses to customized personnel development concepts. In this way, we comprehensively strengthen the technical skills of participants all over the world.
